Essential Oil Nebulizer Instruction Manual

www.consumerassociates.com

PRODUCT INTRODUCTION

The Consumer Associates Essential Oil Nebulizer uses state-of-the-art "cold diffusion" technology that vaporizes oil into fine mist with a burst of air. An essential oil nebulizer is the preferred diffuser of choice by certified aroma therapists, trained massage specialists and skilled counselors because it conserves oil, preserves the natural essence, and maximizes the therapeutic benefits of your essential oils. Immediately start to feel the boost in your energy level, concentration and mood from fantastic aromas throughout your room (up to 1,200 sq ft) without diluting your essential oils (such as with water-based ultrasonic aroma diffusers). You can also mix your own scent with the glass reservoir which is not possible with bottle attached nebulizers.

COMPONENTS IN THE BOX

NEBULIZATION INTENSITY SETTINGS

- Press the Power Button once: Automatic nebulization every 10 seconds
- Press the Power Button twice: Automatic nebulization every 30 seconds
- Press the Power Button three times: Automatic nebulization every 60 seconds
- Press the Power Button the fourth time: Continuous nebulization
- Press the Power Button the fifth time: Power Off

INSTRUCTIONS

- 1 Assemble the nebulizer by pushing the glass reservoir into the base unit. The glass top should fit securely onto the base with no room to be pushed down further.
- 2 Empty out liquids from previous uses.
- 3 Pour 10-15 drop of pure essential oil (only) into the glass reservoir and place the glass lid on top of the reservoir. We recommend pouring enough oil to at least cover the entire based area of the reservoir.
- 4 Attach the USB cord to the bottom of the base, then plug into a USB power source, such as USB power banks, your computer or a USB wall adapter (included).
- 5 Turn on the unit by pressing the power button.
- 6 Cycle through the nebulization intensity settings to desired strength. Please see "Suggested first time usage settings".
- 7 For low strength essential oils, we recommend trying the nebulizer with the lid off.

SUGGESTED FIRST TIME USAGE INSTRUCTIONS

- Pour 10-15 drops of pure essential oil into the empty glass reservoir.
- Priming the Nebulizer: We recommend using a continuous blast (press the power button 4 times) for 15-30 seconds with the lid off to prime the nebulizer.
- Intensity: Then we recommend cycling to the nebulization setting based on desired aroma intensity and/or oil strength.
- We do NOT recommend keeping the nebulizer on for longer than 2-4 hours (based on strength of the essential oil, the size of your room and its ventilation) to prevent over saturation of the air.
- After usage, it is normal for the essential oil to lose its viscosity and thin down to a watery liquid as the nebulizer vaporizes the oil.
- Before the next use, please remember to pour out the liquid from the previous use.

Enjoy the most advanced diffuser for essential oils!

PRODUCT HIGHLIGHTS

- Easy to use plug and play with universal USB cable (included) that can be powered by any computer, power bank or USB wall plug (included).
- Lightweight and slim profile for maximum portability and convenience.
- Beautiful, modern and stylish design that is compatible with every room and environment.
- Adjustable nebulization intensity suitable for any environment and scent desirability.
- Suitable for room size up to 1,200 sqft.

PRODUCT HIGHLIGHTS

Model: Glass Top Nebulizer

Voltage: DC-5V

Power: 5W

Glass oil reservoir size: 20ml

For use with pure essential oil only

Noise level not suitable for sleeping

Manufactured for Consumer Associates in the P.R.C.

ABOUT CONSUMER ASSOCIATES

Consumer Associates is a leading next-gen consumer products company that only launches value-added products. It's the goal of our researchers, designers, engineers and quality control specialists to make all our products innovative, stylish, functional and easy to use. We are based in Seattle, near our largest online distributor, with satellite offices in Hong Kong and Shenzhen where our quality control specialists meticulously check every shipment. Consumer Associates differentiates ourselves by working with our suppliers, and listening to our customers, to make continuous products improvement with new design iterations multiples times a year. Join us on our journey of providing the best consumer products at www.consumerassociates.com and receive your free product warranty and special offers.
